

# Security made easy

The new generation of autoLock AV4D and blueMatic EAV automatic door locking systems for modern entrance doors

# autoLock AV4D and blueMatic EAV

## Maximum security and easy handling – fully automatic.

Whether in a dark or light colour, made of PVC-U, wood or aluminium: Securely and tightly lock doors and unlock them with ease – this is exactly what you can expect from the automatic multi-point locking systems from Winkhaus. In the autoLock AV4D mechanical version and the blueMatic EAV motorised version, the innovative technology with the unique duo hook and the practical daytime latch adapts to your individual requirements. Fully automatic – in the truest sense of the word.

The door is always the first thing you come in contact with in your home – so choose the autoLock AV4D automatic multi-point locking system from Winkhaus.

---

### autoLock AV4D – the mechanical automatic multi-point locking system

---

- + Particularly easy operation of the door at any time of year thanks to the new hook geometry
- + Ideal for dark entrance doors
- + Tried-and-tested automatic locking even after the door has been pulled shut
- + Fail-safe function prevents the door from slamming shut when the hooks are extended
- + The tight seal ensures less energy loss
- + Holiday lockout function increases your security when you're on trips away from home
- + Increased burglar resistance up to RC2
- + VdS approval class B
- + Optional:
  - Innovative daytime latch with one-handed operation to open the door from the outside without a key if required
  - Practical entryguard

In addition to the benefits of the mechanical automatic multi-point locking system, the motorised blueMatic EAV version offers even greater convenience.

---

### blueMatic EAV – the motorised automatic multi-point locking system

---

- + autoLock AV4D can be retrofitted to blueMatic EAV by modular design
- + Can be operated with all access control systems with potential-free contact (fingerprint, smartphone, wireless etc.)
- + Keyless unlocking of house doors with motorised components
